STUDENTS COMING  
EARLY THIS YEAR

Enrollment Expected to Reach  
3000—Penalty Prevents  
Usual Straggling.

In all departments of the University of Missouri, the enrollment this year is expected to total 3000. The table accompanying this shows the steady growth of the University since it was founded sixty-six years ago.

Owing to the additional registration fee of \$5 imposed on students who arrive after the first week, the arrivals are much more prompt this year. Already young men and women are pouring into Columbia, and it is anticipated that the enrollment practically will be completed before next Monday.

The first year of the University the enrollment was seventy-eight students. The first year the normal department was in existence twenty-three students were enrolled. When the normal department was succeeded by the Teachers College the enrollment the first year was ninety-eight, the largest during the first year of any professional school and larger than that of the University itself during its first year.

The enrollment in agriculture the first year it was taught in the University was twenty-seven; the first year of medicine, twelve; the first year of law, twenty-five; and the first year of engineering, fourteen.

TEACHERS HIGH SCHOOL  
NOW IN NEW QUARTERS

Begins Work in Building Formerly  
Occupied by Normal Academy.

The Teachers College high school, which heretofore has been in the Ball building, opened today in the building at the southeast corner of Tenth and Cherry streets.

This is the building formerly occupied by the Columbia Normal Academy. It trebles the amount of space for the high school. Admission there is restricted, only those students being accepted who have either exhausted school opportunities at home, or have obtained written permission from the principal of the high school there.

The high school is part of the laboratory system of the Teachers College, and the aim is to conduct it with the highest degree of efficiency possible. Dr. J. L. Meriam is in charge of the general administration of the school.

## BIGGER THAN BIG BROTHER

James Landon, Former Football Star,  
Brings Students Here.

James Landon, former football star of the University of Missouri and now a wealthy mine promoter of Kansas City, came half way across the State in an automobile from his home last week to leave three freshmen in Columbia.

One of the new students is Landon's brother who is bigger even than the big football man—and "Jim" Landon stands 6 feet 2 inches in his stocking feet. Landon II is 19 years old and will play football. His brother departed for St. Louis in his machine to complete the trip across Missouri.

## GRADUATES MARRY HERE

R. H. Pinkley and Bride to Live in  
Milwaukee.

R. H. Pinkley and Mrs. Pinkley, who until last Thursday evening was Miss Mabel Duncan of Columbia, are spending their honeymoon at Green Lake, Wis., before going to their home in Milwaukee.

Both are graduates of the University of Missouri and Mrs. Pinkley is a member of the Phi Beta Kappa honorary fraternity.

## Dr. Luckey in Washington

Dr. D. F. Luckey, State Veterinarian, is in Washington, D. C., to speak before the Inter-State Association of Live Stock Sanitary Boards on "Federal, State and City Co-operation in the Eradication of Tuberculosis." Dr. Luckey hopes a bill will be passed in the Legislature this winter looking to the eradication of tuberculosis in animals.

## We Wish We Could Teach

everybody that all is not good that looks good. We wish we could teach them the harm that impure candy does. We wish we could teach them that pure candy isn't necessarily high-priced—not at all, if it is bought here. If we could

do this, there would be less sickness, more business for us, and more pleasure for you.
